Diego Alejandro Chávez Gutiérrez

Designer focused on Interactive Technologies and Digital Media. I bring a well-rounded profile that combines a solid foundation in Graphic Design, Brand Identity (Branding) and visual post-production with technical skills in UX/UI design and interface layout. I have experience leading layout design and the production of interactive projects, ensuring visual consistency, usability and clear communication between clients and software development teams. Passionate about continuous learning, goal-oriented work and delivering effective digital solutions to international standards.

SKILLS

Design & production: Adobe Photoshop, Adobe Illustrator, Procreate, Adobe After Effects, Adobe InDesign, Blender, DaVinci Resolve **Back-end development:** Swift, Python, C, C++, GDScript **Front-end development:** SwiftUI, HTML, CSS **UX/UI design:** Figma, Marvel, ProtoPie, Framer
Data Science & AI: Python (pandas, NumPy, scikit-learn), Anaconda, Jupyter, exploratory data analysis (EDA), data preprocessing, statistics, supervised & unsupervised learning, neural networks & deep learning, NLP & large language models (LLMs), generative AI

EXPERIENCE

University of Guadalajara, student; Mexico January 2023 – present

- **Tixal:** Led the programming and design department, optimizing team segmentation to improve efficiency and delivery times (time management). Worked closely with the creative teams to ensure an intuitive interface, balancing the technical side of the software with the aesthetics of the overall graphic design.
- **Kiko's World Cup:** Led the user interface (UI) design, delivering a visually engaging experience, well-structured aesthetic layouts and graphic elements optimized for a global audience.
- **Aura:** Led level design and production. Coordinated the art and programming teams to maintain visual coherence, color palettes and narrative consistency. Helped the game demo get produced in a record two months by optimizing cross-department processes.
- **Mi Primer Huracán:** Designed the digital interface and visual identity, and programmed the interactive app focused on risk prevention and natural-disaster response for children.
- **Rendo:** Developed games using SpriteKit for the interactive graphics. Built a score database and implemented a ranking system.
- **FitIsland:** Created a gamified incentive system that increased teenagers' participation in physical activity by rewarding real-world movement with upgrades to a virtual island.

COMPETITIONS & EVENTS

Changemakers Social Challenge CDMX, November 2024
Hack_athon Swift Changemakers Monterrey, April 2024
CUAAD Hackathon, March 2024
Swift Student Challenge, February 2024
CUAAD Hackathon, April 2025
Hack_athon Swift Changemakers Monterrey, May 2025
CSC 2025, November 2025
City Science Hands-On, August 2026

Certifications

Samsung Innovation Campus 2026 — Artificial Intelligence (Samsung & UDEM) — in progress, expected February 2027
3D Post-Production and VFX — January 2025
Basic Swift Programming Workshop — November 2024
Intermediate Swift Programming Workshop — November 2024
"Heading to the Community Changemakers Hackathon 2024: ARKit" — April 2024
"Heading to the Community Changemakers Hackathon 2024: Core ML" — April 2024

LANGUAGES

Fluent: English and Spanish

AWARDS

Honorable mention, CUAAD Hackathon, March 2024

First place, CUAAD Hackathon, April 2025

EDUCATION

University of Guadalajara – Guadalajara, Jalisco, Mexico
B.A. in Design: Design, Art and Interactive Technologies, 8th semester, in progress
